## Document Body

DaMonica

Per Michele Dermer's request, I contacted US Fish and Wildlife Service regarding the small volume project. I provided USFWS the CEQA initial study and accompanying biology report.

Although there are no impacts on threatened or endangered species, USFWS wants to do an informal Section 7 review (This is a review in which EPA and USFWS discuss impacts to endangered species). It will take about 30 days according to USFWS. This would not affect the timing of the UIC permit, which has to go out for public comment. Also, since there are

no species that can be affected, this primarily is to ensure that there is a record in the file that coordination occurred.
